FRESH

MailChimp

Introduction to MailChimp

MailChimp is an online resource that allows one to make & track an e-mail list plus it can even help you create a short e-mail newsletter to send to your group.

Oct. 11th (Mon.) from 1-2:30pm

FRESH

Javascript

Javascript for the Web

This class goes over a simple way to use JS to create rollovers, cycling banners, slide shows and pop-up windows that can be used on almost any web page.

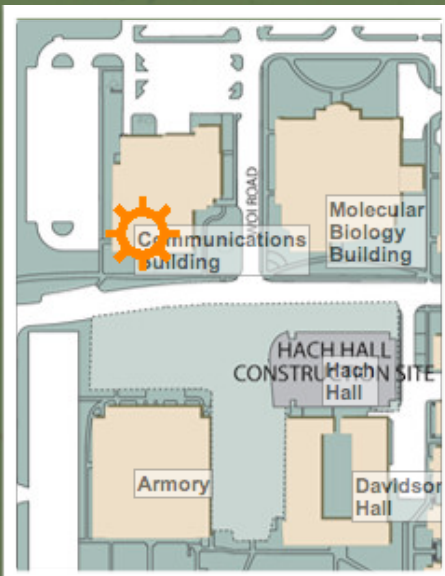

Nov. 11th (Thurs.) from 2-3:30pm

Same great short courses but remember that we are at our new location of 1230 in the Communications Building

More class info is available at:

<http://css.ait.iastate.edu>

IT LEARNING PODS

Coming Events

Try something new this fall! All Classes listed are FREE to current ISU students.

Fireworks

Fireworks Series

Series of two classes that show you how to quickly create drop-down menus, stylized buttons, rollovers and a slide show for the Web with Fireworks.

Starts Oct. 8th (Fri.) from 2-3:30pm

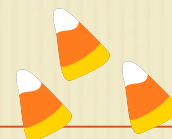

Photoshop

Photoshop Series

Join Photoshop Expert Rich Beachler for a series of four Photoshop classes that go over the basics of image editing then moves on to manipulating artwork, compositing photos and improving poor quality images.

Starts Oct. 12th (Tues.) from 2-4pm

Flash

Flash Series

Series of four classes that show you how to create animated graphics, interactive image galleries, navigational bars, a mini-bulletin board and interactive video for the web using Adobe Flash.

Starts Oct. 22nd (Fri.) from 2-3:30pm

Pre-register for all class at:

<http://www.it.iastate.edu/training/courses>

Pre-registration is required for all short courses.
